

Core for Computational Biomedicine (CCB)

Core for Computational Biomedicine (CCB)

- **Free consulting and analytic support**

Computational Biology

Data science & AI

- **Collaboration on research projects**

Timeline: weeks to months

- **Office hours with experts**

- **Support for**

Generative AI and LLMs

Programming (R, Python, ...)

Biostatistics & Bioinformatics

High-performance compute infrastructure

Data analysis pipelines

Handle large data sets

Prototype models

Need help?

CCB Office Hours

In person on Wednesdays or via Zoom

Contact us if you need help with your project!

AI Seminar & Workshop Series

- 04/01 AI-accelerated scientific writing
& literature review
- 04/14 AI-powered tools for LLM-
assisted coding
- 04/29 **Posit AI tools @ Harvard:**
AI integration in R and Python

Registration Form

WORKSHOP

Posit AI Tools @ Harvard

Advanced AI Integration in R and Python

APRIL 29th, 2026

LAHEY ROOM, COUNTWAY LIBRARY, 5th FLOOR

Learn how to:

Brought to you by the HMS Core for
Computational Biomedicine (CCB)!

- Work with integrated AI tools in RStudio & Positron
- Automate common R and Python coding tasks
- Apply effective prompting for working across files
- Programmatically interact with LLMs in R & Python
- Leverage AI for transparent and reproducible analysis

INSTRUCTOR:

Phil Bowsher
Director of Life Sciences and Healthcare
Posit PBC

ccb_help@hms.harvard.edu
ccb.hms.harvard.edu

AI Seminar & Workshop Series

- 09/24 **Agentic AI for Biomedical Data Science**
- 10/08 ToolUniverse: an Open Platform for Building Agentic AI Scientists
- 11/05 Local AI Inference for Working with Sensitive Data (PHI, ...)

WORKSHOP

Agentic AI for Biomedical Data Science

September 24th, 2026, 2:00–4:00 PM
Countway Library, Room L1-032/ZOOM

Registration Form

Learn how to:

- Direct an AI agent instead of prompting a chatbot
- Manage context to improve AI outputs
- Plan before generating AI outputs
- Validate the output and refine it

Stop pasting snippets. Start directing an agent that reads your project, plans, runs the analysis, and shows its work.

Claude Code · ChatGPT Codex

Brought to you by the HMS Core for Computational Biomedicine (CCB)

INSTRUCTORS:

Anthony Christidis
Computational Scientist

Alex Pickering
Sr. Software Engineer

Grey Kuling
Curriculum Fellow

ccb_help@hms.harvard.edu
ccb.hms.harvard.edu

Ethical, Responsible, and Secure Use of Generative AI

Level 2+

Confidential data must never enter a publicly available AI tool.

Counts as Level 2+:

- Non-public research data
- Medical and patient records
- Student, HR and financial data

Office of the Provost & HUIT

Protect confidential data

Non-public research data counts as confidential.

Review contents before publishing or sharing

AI-generated content may be inaccurate, misleading, or fabricated.

You are responsible for the content you publish

Attribution to a model transfers no liability.

Use HUIT-approved AI tools

Vet new AI tools through HUIT first.
